DIGITAL LABEL FINISHER

## DLF-220 Series Digital Label Finishers

Cut any shape digitally, without the use of dies

Our Digital Label Finishers are all-in-one systems that unwind, laminate, digitally plotter-cut, remove waste, slit, and rewind labels to complete rolls—offering you everything you need to cut and finish short runs from your digital color label printers.

With no need for dies, any shape can be cut via a plotter knife that is digitally controlled by a design file. That means standard or custom-shaped label jobs can be turned around quickly and easily, with professional results.

Operation can be performed with a printer inline, or from a pre-printed roll.
