

any-JET II

ON-DEMAND LABEL & FLEXIBLE PACKAGING FACTORY

FLEXIBLE PACKAGING

DIGITAL LABEL

R2R · LABLES · FLEXIBLE PACKAGING · DIGITAL PRINT & CUT IN-LINE SYSTEM

Transform what you imagine to reality with this 100% digital in-line system.

The anytron any-JETII is based on Memjet technology. It utilizes 1600*1600 dpi high-resolution full-color CMYK.

The high-speed digital printer connects seamlessly with any-CUTII Laser Die-cutter for direct and continuous communication.

The any-JET II is your label production solution, from start to finish. The high-capacity digital label press is fully integrated with a robust laser finishing system. With its advanced label printing press, laminator, and die-cutting features, the any-JET II offers an all-in-one solution to all your label production needs.

The 100% in-line digital printing system incorporates state-of-the-art anytron laser-cutting technology and a powerful single 125-watt laser for a crisp label and packaging creation. Change between jobs quickly or handle multiple jobs at once – the any-JET II can do it!

A dual-purpose printer

Digital labeling & flexible packaging with full-fledged functionality. The any-JET II offers on-demand printing for small- to medium-sized businesses. Print your own packaging or digital labels without effort.

A smaller carbon footprint

No more driving around or wasting time. Experience the full spectrum of digital label production at your own facility.

A cutting marvel

Find your full-cut, half-cut, perforation, marking, and scoring features seamlessly integrated into the production process.

A hassle-free solution

The any-JET II's built-in digital printing press, laminator, and laser cutter offers the all-in-one solution for label production.

A breeze to use

Operating the any-JET II is simple. Create and manage your own packaging without professional or experienced operator. 3 days training is good enough to be a specialist.

Flexibility is at your fingertips

From start to finish, the process is in your hands. Choose your design, schedule your production lead time, and make changes in the comfort of your own office.

The Latest Breakthrough in single pass production

DIGITAL LABEL PRO, ANYTRON

Autojob changeover(option)

The sensor detects each QR code which contains cutting information to change the job automatically.

Two-in-one
More Benefits at Less Budget

The any-JET II gives you more benefits for less. Have you ever been frustrated with less-than-perfect service from your printing provider?

Take charge with the any-JET II and print, laminate, slit, and scribe labels (and packaging) all in your own time. Cut lead time and improve your productivity - it is all possible with the any-JET II.

any-FLOW

DIGITAL LABEL PRO, ANYTRON

Workflow software for digital in-line printing

any-Flow is a multi-functional workflow software that allows you to control your digital printer and laser die-cutter in one go.

The workflow software is an image rasterizing processor that provides VDP(QR code, Barcode), Color management for high-quality label printing.

It allows for quick editing, printing, and cutting control - all on the same software. On-demand label/ flexible packaging production becomes much simpler.

RIP Software

any-Flow gives you VDP printing, color management, file merging, media saving, label cost evaluation, and more!

Convenient PDF file

Generate individual printing and cutting files from a PDF data file.

Job management

Send jobs to the printer and die-cutter and control it easily with the 'delete,' 'add,' 'change,' and 'prioritize' functions.

Three-modes for your convenience

Choose from Print-only, Cut-only, or Print-and-cut mode.
